

Printer 5808

General

Alphanumeric Printer 5808 is used in various workstations. The design of the printer is based on the special requirements of financial data processing. Printer features include:

- Matrix print technique eliminating printing errors
- Program-controlled document sensors to active printing and to provide safeguards against fraudulent use and printout of wrong documents.
- Program-controlled normal type and boldface, enabling the system designer to emphasise special messages and headings.
- The printer handles a wide variety of documents including passbooks, vouchers, journal and tally tapes.

Ergonomic research in the field of teller terminal operation played an important part in the design work on the alphanumeric printer and is reflected in its special profile, small size and ease of operation.

Function

Documents are inserted to the bottom stop in the document chute. Line feed is controlled by the program or manually. In addition to the original, four copies can be obtained of form printouts.

Both passbooks with vertical and horizontal spines can be used.

A tape is provided as a supplement to passbooks and can be used, for example, for journal entries. It is located, behind the document insertion guide, under a lockable cover.

A second tape, original plus one copy, can be located to the right of the insertion guide. The original tape can be torn off while the copy is retained beneath a lockable hood.

Features

- Ergonomic design
- Advanced document handling
- Two journal tapes
- Prints up to 5 copies (including original)
- Adapted and/or special character sets available as options

Optional features

Character pitch:

- Standard typeface 2.12 mm/character
- Boldface 4.23 mm/character

Technical Specification

Character set	64 characters
Typefaces	Standard typeface 7×9 dot matrix Boldface 7×10 dot matrix
Printing speed	Standard typeface 100 characters/s Boldface 50 characters/s
Head return	140 characters/s
Character height	2.5 mm
Character pitch	Standard typeface 2.54 mm character Boldface 5.08 mm/character
Line pitch	4.23 mm/line 5.08 mm/line
Width passbook/voucher	Maximum horizontal A4-size
Width journal tape	116 mm
Width right located tape	70 mm
Power supply	Connected to Terminal Power Supply
Power requirements	Max 105W
Dimensions (width×depth×height)	473×351×296 mm

Subject to change without notice.
